Customer Reviews

Its interesting but I do not know if it is fact or fiction. People who prescribe things without a degree are out to get your money

Well written and stated the obvious concerning information that is readily researched on the internet.

Interesting analysis of the topic - not much different from any synopsis found on the internet - not worth the price

This is a very interesting book. Just because you did not grow up exposed to lead paint does not mean your health has not been effected by the environment. You will be surprised by everything that does have a daily effect on your health. It reminds us sometimes you need to think outside the box in order to maintain your good health. Well written. I am sure that you will learn from this book. Enjoy!

Some good information, basic tho, Read it in one sitting and the comparison between synthetic and natural was mote then helpful , now just need to find a more in depth book with a good protocol
