Customer Reviews

Love this book! While doing my externship this book was recommended to me. I am very glad that I ordered it. It includes labs and the corresponding tube colors which is something I needed. It is wipeable and will fit in the pocket of my scrubs. I have already recommended it to the other students who were in class with me.

The pocket guide is extremely useful - I will not lie but I thought it was going to be a tad bit larger; it is like one of those small spiral notebooks that old-school reports use in movies. Haha - do not let the size fool you, it is full of useful information. I am in a Medical Lab Tech course and phlebotomy is one of the subjects that is covered - so having this guide is useful.

I ordered this for my phlebotomy class and everyone in the class decided to order one too. This little

pocket guide is perfect. It even includes things we did not learn in class. Nice size, sturdy material and arrived in one day with one day service. You can't go wrong with this guide.

It is a very useful notebook!!! I highly recommend it for Phlebotomy students and for Phlebotomists. I like that there is plenty of areas to write your own notes. I also like that if it gets wet, the liquid wipes right off. Very good buy!

My teacher recommended this to me for class and I loved using it during my internship! Very easy to use and has great little "tips" with easy to understand index, GREAT for tube colors!

I am a medical assistant student and this has been very beneficial! It has a lot of information, with step-by-step instructions with pictures. This is essential if you will be doing any phlebotomy of any kind. I have posted pictures, because I didn't like how little of a preview there is of the book.

These Phlebotomy Notes were very helpful overviewing all key notes for my Exam and while doing my Clinicals, very easy to navigate. Will continue to use it through my Career in Phlebotomy

Perfect; I'll be using this quite a lot in the field.
