ICC is a leading organization dedicated to developing a single set of comprehensive, coordinated national model construction codes. To date, 48 U.S. states have adopted various international codes from ICC.

Big Tommy the Carpenter here. Do you know the current building codes? Most dudes in the trades do not and the codes change over the years as we come up with better building concepts. This is a great reference to have at your desk or in your truck so you are ready for the inspections, the first time. I also use it to point out mistakes or things that were looked over. Big Tommy says, if you are

not sure, then this has the answers.

If the IBC would go back to logical locations and cross referencing rather than the multiple cross referencing where we have to go to a half dozen locations to attempt to piece together the needed information it would be great. Back in the UBC days, one Code book the size of a thick paperback gave us the information we needed. Now we have to buy multiple books, poorly cross referenced which seem to be written like a puzzle and when put together approach the IRS standards in quantity of words.

Does anyone really love a code book? Maybe not, but it is an essential part of day to day life of an architect. I do like the fact that was right priced and quick with delivery! The existing building code is an essential reference if you work on existing structures, the older the more appropriate this code.

thanks

too expensive, too cumbersome

all good

New Castle County, DE did not accept this as valid. It seemed fine to me

The book which I received does not contain pages from 165 till 213. these pages are missing from the books. please review it and do the needful, if i received the missing pages would be fine.
