Chris Botello began his career as print production manager for Premiere magazine, designed movie posters for Miramax Films, and served as the art director for Microsoft's launch of sidewalk.com/boston. He is the author of Revealed Series books on Advanced Photoshop, Illustrator, InDesign, and InDesign Interactive and is the co-author of YouTube for Dummies. Chris commutes between Los Angeles, where he works as a designer and retoucher on movie campaigns, and Marion, MA, where he teaches computer graphics at Tabor Academy. Chris uses his own books - including Adobe Illustrator Creative Cloud Revealed - as the text for his classes.

I've used all the CC Revealed books now. They are great to learn from because the end of chapter

tasks are very detailed and super easy to understand. I'm using this for a class I'm in and I've worked almost halfway thru the book on my own just because it's helped that much. I'm a procrastinator so getting me to do work is like prying teeth, but doing work from this book- no problem!

Had to buy this book for university. Don't waste your money. As a designer already 4+ years in the field, this book is a complete joke. Even for beginners.

I'm taking a class and this is the textbook being used. The chapters are well organized and the subject matter is explained quite well. I'm a complete beginner with this program and I'm actually getting the hang of it rather quickly.

This book (and the whole series) is good. You will learn if you read the content, and practice along with the exercises.

Really, really good step-by-step guide to Adobe InDesign. I knew nothing about the program before this book, and feel like I'm at LEAST intermediate in the program in just a few weeks. Very powerful.

Good book.

well written with clear instructions
