# Cool Soapmaking: The Smart Guide To Low-Temp Tricks For Making Soap, Or How To Handle Fussy Ingredients Like Milk, Citrus, Cucumber, Pine Tar, Beer, And Wine (Smart Soapmaking Book 5)

## Synopsis

SPECIAL NOTE! Anne L. Watson will personally answer any question of yours after reading this book. Ask on her web site, and you'll normally hear back within hours! Soapmakers may love to add a variety of materials to soap, but they find that some cause more trouble than others. In the heat of the chemical reaction, an ingredient might discolor, or lose its scent, or develop a bad smell. Or it might cause problems during soapmaking, giving off noxious fumes, or making the soap harden so fast that there's no time to pour it in the mold. Help has arrived. Anne L. Watson extends the low-temp techniques from her book "Milk Soapmaking" to making soap from a variety of special ingredients, including cucumber, citrus, pine tar, beer, and wine. Soaps that have long challenged home soapmakers will now pose no problem at all. Anne L. Watson is the author of the wildly popular and widely acclaimed beginners book "Smart Soapmaking" and its companions, "Milk Soapmaking" and "Smart Lotionmaking." She has made soap professionally under the company name Soap Tree, and before her retirement was a historic preservation architecture consultant. Anne's other published books include "Baking with Cookie Molds" and several novels. Anne, her husband, Aaron, and their cat, Skeeter, live in Friday Harbor, Washington.

## Customer Reviews

Not tons of new information but her books are clear and easy to understand. Her no-nonsense writing style makes her instructions easy to follow. I'm glad to add this to my collection but if you are a beginner, get Smart Soapmaking, it will give you enough solid information to get off to a confident start. If you add Milk Soapmaking to that one, you don't really need this one, but for the price, I was happy to add it to my collection.

Excellent, solid foundation of knowledge on soap making. All of the advice in this book is based on science and well-founded personal experimentation and it shows. The recipes in here that I have used have been top notch. My husband particularly likes the recipes for beer soaps, but I'm looking forward to making some cucumber soaps this next summer with produce from my garden. Thanks for making another excellent book, Anne Watson!

Here is yet another of the books I have come to use as indispensable tools for soap making. The books have stayed consistent in writing style, being both easy to read, understand and follow along

with the processing. These are specialty soaps made out of all kinds of different ingredients, it is amazing just what you can use for soap making. There are great recipes in this one and then she gives how to go on and find more things to try, advising so not all of your trials will flop. I especially like the citrus portion as I understand this variety is harder to get to set, but smells wonderful. I have been incredibly pleased with every book in this series from beginning to end and would definitely recommend them.

I love all her books! Well written, detailed and easy to follow. I plan on making soap although just got everything I need so haven't started yet. Can't wait! FYI - I own all her books!

Anne Watson is the absolute best at explaining soap-making in a clear way without being alarmist. Cool soapmaking (keeping the ingredients cooler so the lye compound won't scorch) opens a whole new world of soap-making. I've already followed her very solid advice on cool soapmaking with milks, and am looking forward to trying cucumber juice. Wonderful book!

I can't wait to try making soap. The book has large font and easy to read.

Great basic guide to working with some finicky ingredients. Love it!

I can't wait to try a couple of the recipes, Coconut Beer Soap especially. This was a really informative book and great for soapers who have a few successful batches in their belt. If you're a beginner, however, I suggest you get your technique down before jumping into any of this.
