Great Inventors And Their Inventions

Synopsis

Archimedes, Gutenberg, Franklin, Nobel, Bell, Marconi, the Wright Brothers, and Edison: Nine remarkable men produced inventions that changed the world. The printing press, the telephone, powered flight, recording, and other innovations have made the modern world what it is. But what were the men who had these ideas and made realities of them like? As David Angus explains, they were very different: quiet, boisterous, confident, or withdrawn. But all had a moment of vision that they combined with single-minded determination to battle through numerous obstacles and produce something that really worked. This is a fascinating account, especially for younger listeners.

Book Information

Audible Audio Edition

Listening Length: 2 hours 32 minutes

Program Type: Audiobook

Version: Unabridged

Publisher: Naxos AudioBooks

Audible.com Release Date: November 21, 2006

Whispersync for Voice: Ready

Language: English

ASIN: B000KWZ6O8

Best Sellers Rank: #79 in Books > Audible Audiobooks > Children's Books > Science & Nature

Customer Reviews

I like that I can listen with my child as I do chores. I like that it has classical music in between the chapters. It is very informative.

My 11 year old and I listened to this in the car. Very interesting stories about a variety of scientists. Only downfall is the british accent which my son didn't understand at times, I personally enjoyed it!

Over the years my family purchased more than thirty of the Naxos Junior Classics. The discs were wonderful to listen to on the way to school and other long car rides. Both the kids and the adults in my family loved the Naxos stories and we learned so much over the years. Great Inventors is one of the best titles. The stories are interesting, informative and inspiring. This title is read by Benjamin Soames, our favorite Naxos narrator, who does an excellent job and has a wonderful reading voice. My family truly enjoyed the Naxos audio collection and I hope your family will, too!
