A Manual For Writers Of Research Papers, Theses, And Dissertations, Seventh Edition: Chicago Style For Students And Researchers (Chicago Guides To Writing, Editing, And Publishing)

Synopsis

Dewey, Bellow, Strauss, Friedman--the University of Chicago has been the home of some of the most important thinkers of the modern age. But perhaps no name has been spoken with more respect than Turabian. The dissertation secretary at Chicago for decades, Kate L. Turabian literally wrote the book on the successful completion and submission of the student paper. Her *Manual for Writers of Research Papers, Theses, and Dissertations*, created from her years of experience with research projects across all fields, has sold more than seven million copies since it was first published in 1937. Now, with this seventh edition, "Turabian's Manual" has undergone its most extensive revision, ensuring that it will remain the most valuable handbook for writers at every level--from first-year undergraduates, to dissertation writers apprehensively submitting final manuscripts, to senior scholars who may be old hands at research and writing but less familiar with new media citation styles. Gregory G. Colomb, Joseph M. Williams, and the late Wayne C. Booth--the gifted team behind *The Craft of Research*--and the University of Chicago Press Editorial Staff combined their wide-ranging expertise to remake this classic resource. They preserve Turabian's clear and practical advice while fully embracing the new modes of research, writing, and source citation brought about by the age of the Internet.

Customer Reviews

First published in 1937, Turabian's manual has been updated to reflect the fifteenth edition of *The*

Chicago Manual of Style (2003) as well as the habits and needs of today's students. The chapter on source citation now includes sections on online databases, e-books, and "informally published electronic sources." A new and lengthy part 1, "Researching and Writing: From Planning to Production," cautions researchers to "beware of Wikipedia" and "never cite it as an authoritative source." Another caution: citation software "may save time, but it is not a substitute for knowing the underlying principles of the style." Quinn, Mary Ellen

"This latest edition of the trusted Manual for Writers not only answers nearly every question related to scholarly writing that students could possibly have, but it is full of helpful and wise advice about researching, organizing, and writing everything from undergraduate papers to doctoral dissertations." - Paul S. Boyer, Merle Curti Professor of History Emeritus, University of Wisconsin - Madison"

I am in the process of writing a research book on my father's World War II experience in Europe. Since his part of the war was not as popular as the airborne units or Patton's 3rd Army, it has taken considerable research trips to gather enough information to credibly document his unit. I needed some guidance to accurately cite my resources and describe what I found so that I could create a document worth reading. I have not begun the actual writing of my project as yet but this book has provided some direction in what to look for and how to organize my research.

Like every one else who writes research papers, I wish folks would pick one style and drop the rest. If I had my druthers, I'd use the APA format as it seems to be more prevalent. As a style guide, this is a fine resource, but I would have liked more completed examples since I have to change from style to style and prefer looking at what's needed as opposed to reading a dry bit of writing on how to do it.

Had to buy this book so that I could write papers for a class. Used less than one chapter but this is the only place you can find the Turabian style of reference notation. Another academic scam.

I have been using Turabian since my high school years which was a long time ago. I never like having to consult Kate because that means I am writing some paper for a class. However, when formatting, footnoting or just plain questions about the written form of the English language, Kate never lets me down. This is the first time I have used the Kindle version and I like the search and

"Go To" features to find exactly what I need. Good to see you again Kate and thanks.

Well worth the \$\$..It has chapters to help you define your topic or hypotheses. Chapters on research, Chapters on deciding who your audience is and then writing appropriately and Chapters on Chicago Style referencing are all included.This book is an easy to follow, step-by-step, writing manual that works for everything from writing High School papers to College and even early-Master's level papers.It has a great 'tree' of starting and then saying if you have your subject, skip to here, if you need to develop a question go to ____ chapter, and so on.Fairly inexpensive and well worth the money.

if your prof says follow it.. you have to get it.. so .. end of storyI just wish this came with the option of having it in a spiral binding .. as I use it when writing papers.. and flipping through it breaks the binding.. also I have tabs.. I put on the pages..I wish they would set this book up .. with spiral binding, tabs for easy access and quick finding of what you're needing to site..

Shipping was expected with no delays.I recommend this book if you're having trouble writing your papers for college. Detailed and easy to follow guideline. Plenty of examples to refer to.Really helped me with my research paper.Got this during a lightning flash deal for only \$11 or so! Worried that the condition might be bad but it wasn't beaten up and it arrived safely.

This book is pretty useful in writing. I wish it had a more robust intro for newbies though. It was daunting to read at first
